COLORADO DEPARTMENT OF HEALTH (CDH) OPEN BURNING PERMIT APPLICATION SUBMITTAL
TO DOE, RFO

Enclosed please find an open burning permit application for weed control burning at selected plant site locations for submittal to CDH, Air Pollution Control Division (APCD). Included with the permit application is a weed control burn plan for use by CDH in their application review.

The enclosed application and burn plan describes areas which EG&G Plant Services requests approval to control weed growth by controlled burning. These areas include the buffer zone and Protected Area (PA) perimeter fence lines, railroad right-of-way, and water courses, ditches, dams and spillways. This course of action for weed control was necessitated by compliance with Rocky Flats specific water quality standards for state approved herbicides. Planned burn areas will be limited in size and controlled by Plant Services personnel. The on-site Rocky Flats Fire Department has been notified of this proposal and will provide backup support for area control.

If you have any questions concerning this application, please contact either G. H. Setlock (273-6075) or R. J. Crocker (273-6203) of my Clean Air & Environmental Reporting Division.

J. M. Kerish, Associate General Manager
Environmental Restoration & Waste Management
